CSC322 Final Report - Team H

Nabil Omi, Tanim Islam, Jobanpreet Singh, Jiazhou Zhang

Task 1: 70%
- The layout was not personalized, but we had everything else. Employees, Users, and Visitors all had different views when logged in.

Task 2: 100%
- Everything listed in this part of the spec is present.

Task 3: 100%
- Everything listed in this part of the spec is present.

Task 4: 100%
- Everything listed in this part of the spec is present.

Task 5: 100%
- Everything listed in this part of the spec is present.

Task 6: 80%
- We are missing the check for allowing the customer to rate only after they purchase an item. We have the complaints and compliments in place. Additionally, we have the review system in place.

Task 7: 90%
- All we are missing is the firing employee system. Everything else is present.

Task 8: 50%
- We do not have individual PC rating systems in place. Our rating system is based on individual parts.

Task 9: 0%
- We do not have language checking.

Task 10: 50%
- We have a very robust purchase history feature and use an always online database to handle all transactions. Compared to other projects which may not persist a user's transactions, any account is completely independent and will appear the same on many different PCs.

Team Members Evaluation:
Nabil Omi: 100%
Tanim Islam: 100%
Jobanpreet Singh: 100%
Jiazhou Zhang: 100%
